## How do I show a question conditionally based on another question's response?

Last Modified on 17/01/2024 1:50 pm AEDT

When setting up a registration form in GameDay, you may want to create questions that only display if the registrant selects a specific response to another question.

For example, if you have a question titled '*Do you have any allergies?*' where the responses are *Yes* and *No*, you may want to display a second question called '*Please list any allergies you have*' for users who answer *Yes*, and hide this question for anyone that answers *No*.

**Note:** The steps below demonstrate this process through a Membership Form, however the same functionality is available when creating an Event.

To make a question conditional upon another question's response:

1. In the left-hand menu, click **Membership Forms** > **MEMBERSHIP FORMS**

2. **EDIT** the relevant form

3. Click the **QUESTIONS & LAYOUT** tab

← Back Copy Form Link

## 2024 Membership

Active

1 Settings 2 Products 3 Add-on Products 4 Bundle Discounts 5 Questions & Layout 6 Messages & Notifications 7 Test & Publ >

**Basic Settings**

Title of Form (displayed publicly)\*  
2024 GameDay Membership Registration

Internal Form Name\*  
2024 Membership

4. Ensure you have added both fields that you want to conditionalise to the form, either through the **ADD EXISTING QUESTION** list or through the **ADD NEW QUESTION** feature

**Note:** Ensure the control question (I.e. the question which triggers the second question to show or hide) is placed above the conditional question in the layout of the form

5. Once you have added your questions to the form, click the drop-down arrow next to the conditional question to expand some additional options

Create New Question

- Text Field
- Number
- Picklist
- Multiple Choice
- Date
- Checkbox
- Terms or Privacy Policy
- Document Upload

Mobile Number

Which member types are you registering as?

Do you have any Allergies? 01

Please list any Allergies you have 02

Emergency Contact Details 03

6. Under **Advanced Options**, click **EXPAND**

Tr Please list any Allergies you have 02 ^

**Question details**

Question Text \*

Please list any Allergies you have

Help Text

Is this question mandatory? \*

Yes No

Advanced Options Expand

7. In the **Show question only if users answers** section, select the control question from the list, and select the relevant answer that is required to be selected in order for this conditional question to show

Advanced Options Close

Show this question to Please select  Show to All Member Types

Show this question to gender(s) All Male Female

Show this question to all ages? Yes No

Show question only if user answers

Form Question Do you have any Allergies?

If answer selected is \* Yes

Show question only if user selects product

Form Products Please select

8. Click **SAVE**

This question will now show or hide automatically based on the response selected on the control field by the registrant
