How do I add answers for picklist and multi-picklist questions?

Last Modified on 07/10/2019 3:16 pm AEDT

Picklist and Multi-picklist questions require answers to be entered so members can select from a list. The method for creating the answers is different depending on where you created the question.

**If you added a question from the Questions tab under Products & Forms**

Click on the name of the question to open it.

Select the **Answer Options** tab.

Click **Add New Answer Options**.

Enter your first answer option in the **Label** column and copy it to the **Value** column. Continue to **Add New Answer Options** until you enter all the answer options.

You can specify the order in which the answers should appear, by entering the number under the **Order** column.

Click **Save** once you have entered all the answer options.

If you added the question from the Questions & Layout tab within the Registration Form

Once you have added the question, scroll down to the **Answers** section and click **Add Another**.

A new line will open up. Enter your next answer option.

Click **Add Another** to continue to adding your answers, until you entered all options.

Click **Save.**
