How do I create a new registration form?

Last Modified on 07/10/2019 11:49 am AEDT

From Products & Forms, select the Forms tab.

Click Create New Form. This will open the Create Form Window.

Fill in the Internal Form Name and Title and ClickSave.

The screenshot shows the 'Create Form' window. It has a title bar with 'Create Form' and a close button (x). The form contains two input fields. The first field is labeled 'Internal Form Name *' and contains the text 'National Registration'. The second field is labeled 'Title of Form (as displayed) *' and contains the text 'National Registration Form'. At the bottom right of the form, there are two buttons: 'Save' (highlighted with a red box) and 'Cancel'.

The Form will be created and opened in edit mode so you can add your own products and questions.
