

## How do I create questions that depend on other questions?

Last Modified on 07/10/2019 3:28 pm AEDT

You might want to create questions that, depending on the answer, need other questions answered. These are conditional questions. For general information on how to create a conditional question, please see [How do I make questions available to specific members?](#)

Add your first question as you normally would. Go to the bottom and click **Advanced Options**.

Select which members will need to answer the question and if it is specific to an age group or gender.

A screenshot of the GAMEDAY question creation interface. The form includes fields for 'Question text' (containing 'Have you played for other clubs?'), 'Question help text (Optional)', and a checkbox for 'Is Mandatory for User' which is checked. Below these is an 'Answers' section with a table showing 'Yes' and 'No' options. At the bottom, the 'ADVANCED OPTIONS' section is highlighted with a red box. This section contains two rows of checkboxes: 'Show this question to' with options for 'Player' (checked), 'Volunteer', 'Coach', and 'Official'; and 'Show this question to' with options for 'All Gender' (selected), 'Male', and 'Female'.

Click **Save** at the bottom of the question.

**NOTE:** do not click Save at the top of the form. Only click Save at the bottom of the question.

Add your next question. This is the first question that is dependent on the previous question.

Click **Advanced Options**.

Tick or untick the same options as you did in the previous question.

In the **Show question only if answer equals** section, select the previous question you created.

The screenshot shows a dropdown menu titled "Show question only if answer equals". The menu is open, displaying a list of questions. The first option is "Have you played for other clubs?" with a dropdown arrow. Below it is "--None--". Then, "CC Test Primary Picklist" is selected and highlighted in blue. Other options include "CC Test Primary Multi Picklist", "Allergies?", "Allow Medical Treatment?", and "Have you played for other clubs?" at the bottom, which is also highlighted in blue. A plus sign icon is visible on the left side of the menu.

In the **If answer equals** section, select the answer that requires this question to be visible.

The screenshot shows the "IF ANSWER EQUALS" section. It has a header "IF ANSWER EQUALS" and a dropdown menu currently set to "Yes". Below the dropdown, there are two buttons: "✓ Check all" and "✗ Uncheck all". Underneath these buttons, there are two radio button options: "Yes" (which is selected) and "No".

In this example, the second question should appear if the member answers Yes to the first question.

Click **Save** at the bottom of the question.

**NOTE:** only click **Save** at the top of the form if you are finished adding questions.

If you have further questions that need answering, enter them as you normally would. Follow the same process above to make further questions dependent of another question.

Once you have added all of your questions, click **Save** at the top of your form.
