

Adding News Articles into the Slideshow

Last Modified on 26/11/2018 3:01 pm AEDT

To add a News article into the News Slideshow on the homepage, you simply need to assign the news article to the "slider" category.

You must also select a Feature Image for the news article that is in the right dimensions - **85px width x 480px height**

If the image is smaller than this, then the news article will not display in the news slideshow.

The image can be larger than this size, but try to keep a similar aspect ratio (landscape rectangle) so that the image isn't cropped.
