

## How do I customise the look and feel of all of my Membership Forms at once?

Last Modified on 30/08/2023 10:04 am AEST

Membership Forms include the ability to customise the look-and-feel of your public forms using GameDay's **Form Display Template**.

A Form Display Template can be applied broadly to all Membership Forms in your database, including when a form is shared to a lower hierarchy level.

To access the Form Display Template:

1. In the left-hand menu, click **MEMBERSHIP FORMS**.

2. Select FORM DISPLAY TEMPLATE.

My Forms	Shared Forms	Form Display Template	

The Form Display Template provides significant flexibility in the way you want to present the front-end version of your Membership Forms, with features including:

Form Display Template		
Applie View Desktop View	1	
Form Background	··· R	
Recommended maximum image size is 1920px x 1080px. jpg is recommended.

1. **Preview Container**: Allows you to preview any colour changes you make on the template.

2. **Desktop/Mobile View**: Allows you to toggle the format of the Preview Container to display either desktop view or mobile responsive view.

3. **Background Image**: Allows you to add a custom Background Image.

4. Button Colours: Allows you to customise the colour of buttons and button text.

5. **Text Link Colour**: Allows you to customise the colour of text hyperlinks.

6. **Background Gradients**: Allows you to further customise your Background Image by applying gradient colours.

7. Form View Settings: Allows you to customise the colour of your Progress Bar and Progress Bar Text.

You will also notice that there is a Contrast Checker when applying your colour scheme. This assists you in setting colours that contrast enough so as to allow text to be seen clearly against their background containers.
