GAMEDAY

How do I log into another organisation in my hierarchy?
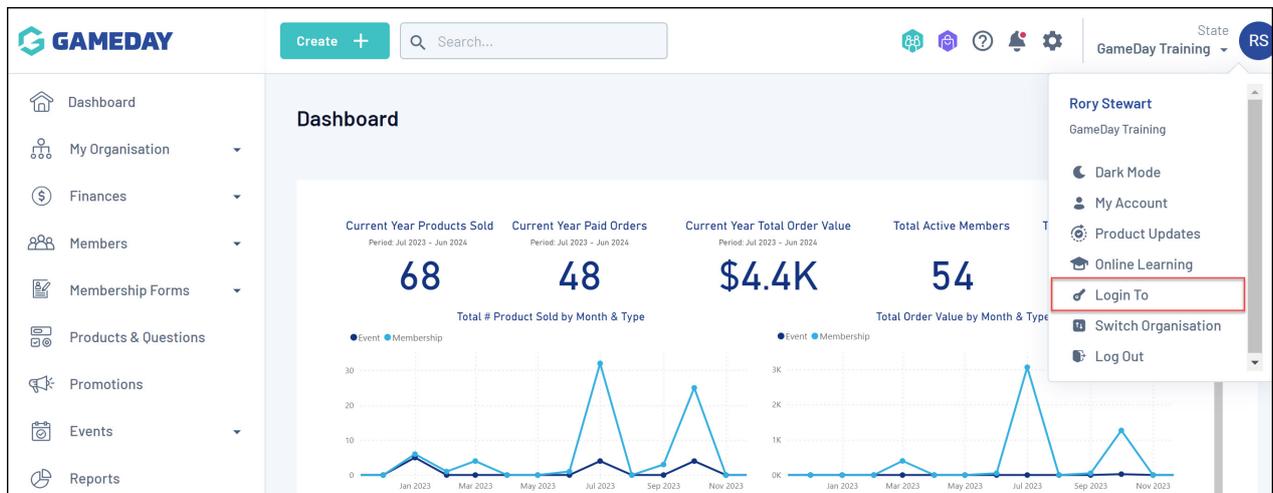

Last Modified on 15/11/2023 11:55 am AEDT

If you are using GameDay as part of a multi-tiered hierarchy, you can login to the database of any other organisation linked below you within your hierarchy.

> **Note:** Administrators cannot login to organisations that are above, or next to their organisation through their GameDay login.
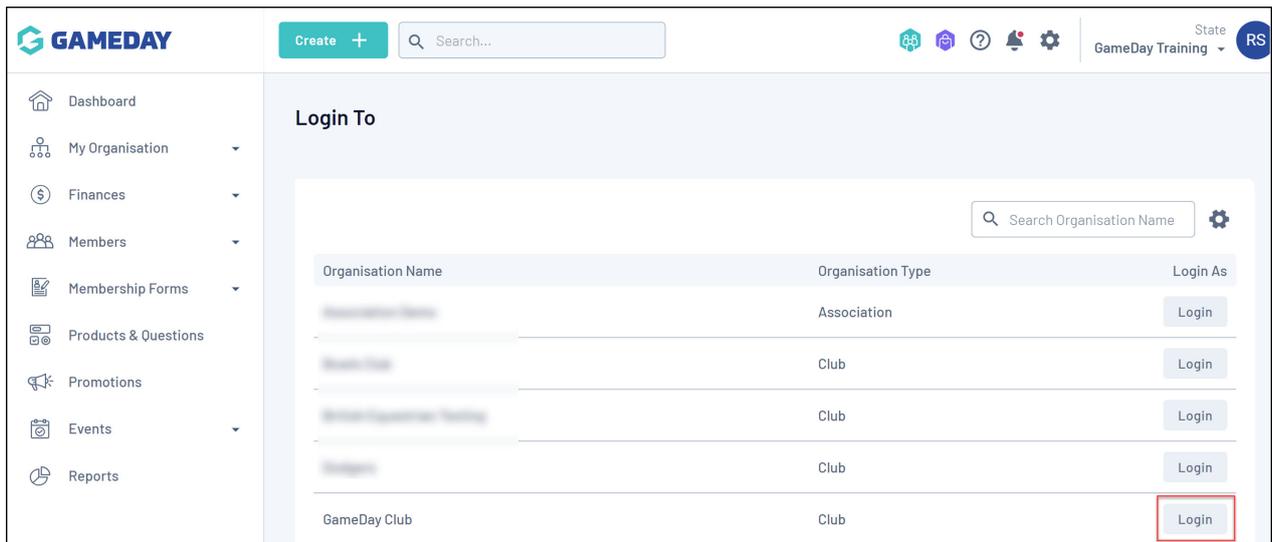

There are multiple methods of logging in to an organisation below yours in the hierarchy:

'Login To' Feature

1. From your GameDay database, open the Account Menu, then click **LOGIN TO**

2. Here, you will be shown a list of organisations that are linked below you in your hierarchy. Login to an organisation by clicking the **LOGIN** button

You will then be logged into the organisation you selected, indicated by the organisation name in the top-right corner of your screen

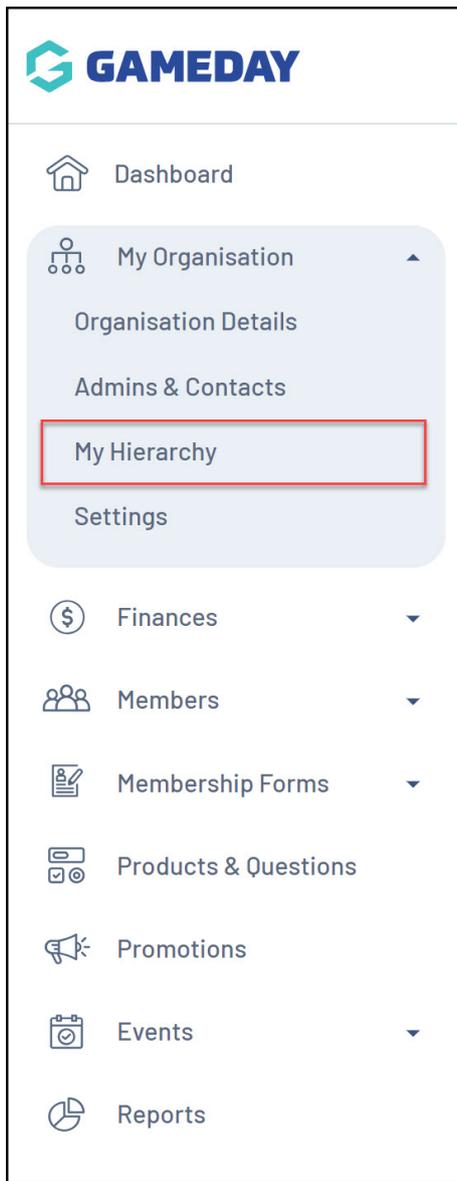

3. To navigate back into your original organisation, click the banner link at the top of the screen.

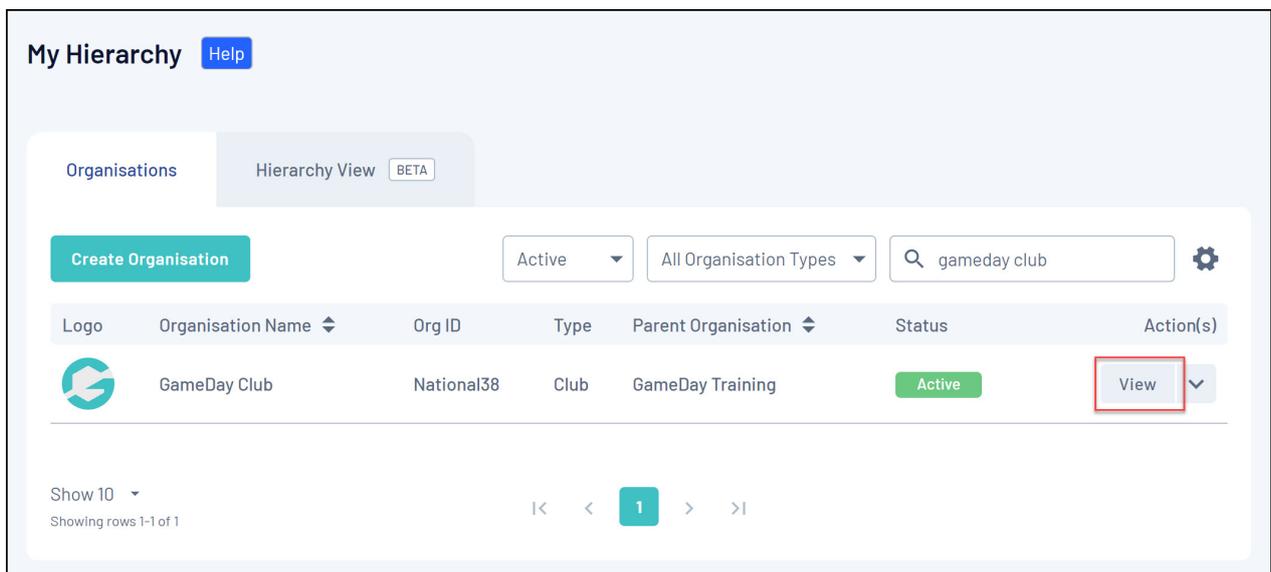

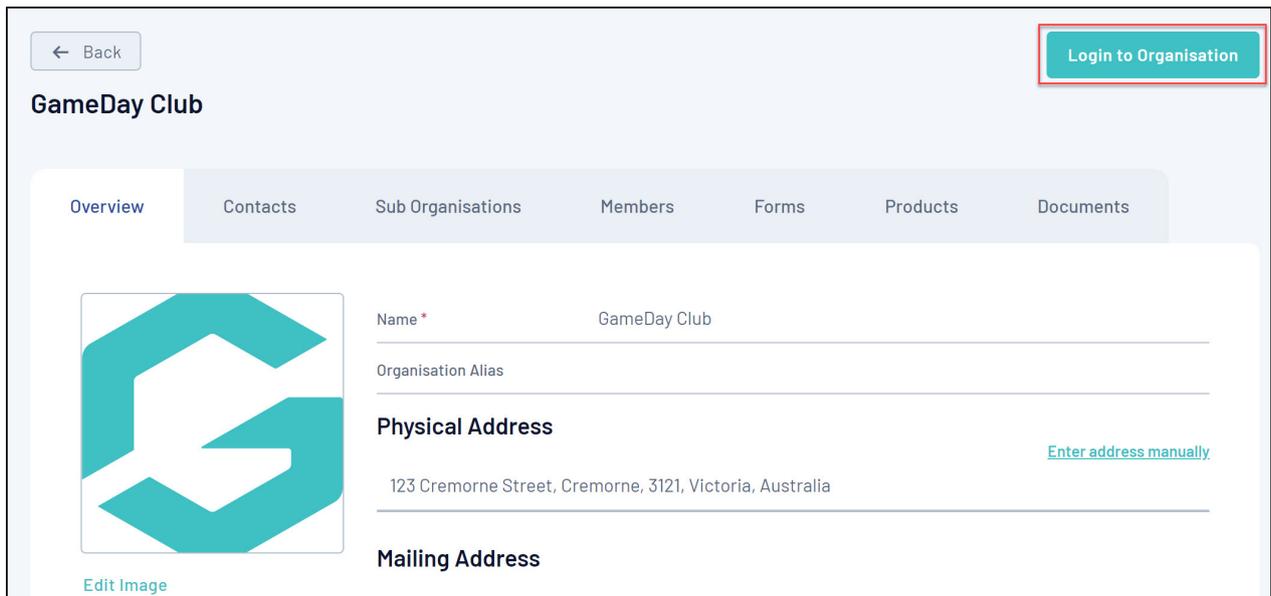

'My Hierarchy' Feature

1. From your GameDay database, open the **My Organisation** menu, then click **MY HIERARCHY**
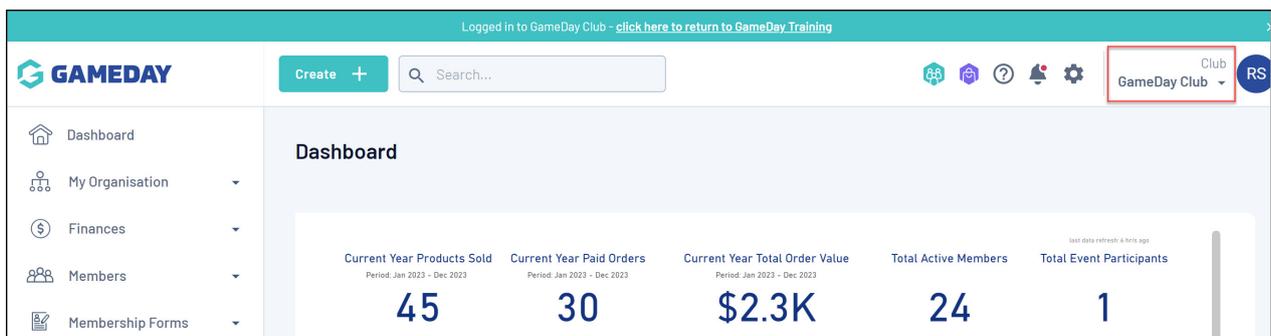

2. Find the organisation within the list, then click **VIEW**

3. Click the **LOGIN TO ORGANISATION** button

You will then be logged into the organisation you selected, indicated by the organisation name in the top-right corner of your screen:

4. To navigate back into your original organisation, click the banner link at the top of the screen.
