

Gender Identity Capability

Last Modified on 15/04/2024 3:05 pm AEST

As part of our partnership with **Pride in Sport Australia**, GameDay is proud to support the collection of gender identity data across the product suite wherever gender data is collected. This implementation has brought about updated terminology and input fields to better capture information, as well as represent and include people of diverse genders and sexualities. It also integrates more inclusive gender identity fields into applicable registration forms, member lists, member profile screens, reports, and dashboards.

The below fields are available to use on registration forms and member records in GameDay:

Gender at Birth

The **Gender at Birth** field is the sex the member was given at birth which is specified on their birth certificate. The options available are:

- **Male**
- **Female**

Gender Identity

This is a new field included within forms and member records to allow your members to specify their current gender identity. This includes the following options:

- **Male**
- **Female**
- **Non-binary/gender fluid**
- **Different Identity - if selected a text box will appear for the user to enter their identity**
- **Prefer not to say**

You can find all Gender field on back-end [member records](#):
