

Notifications

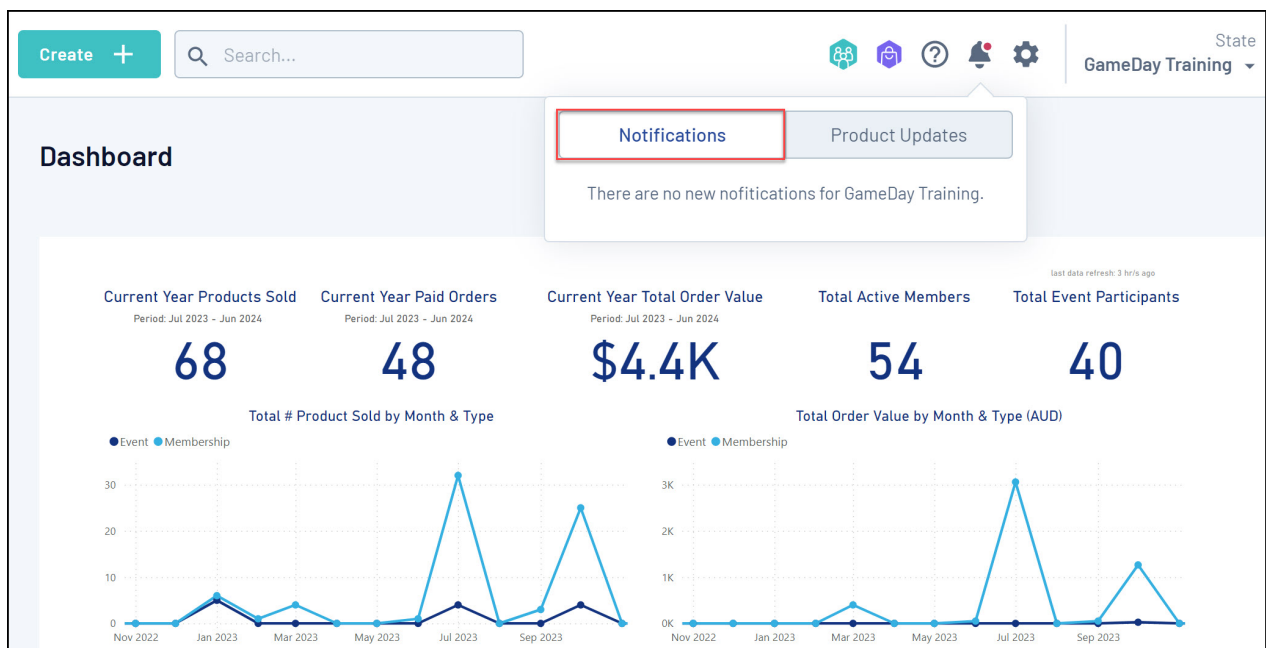

Last Modified on 30/10/2023 3:13 pm AEDT

The Notifications Centre is accessible to all GameDay administrators, providing both system-based notifications and updates such as release notes and product updates.

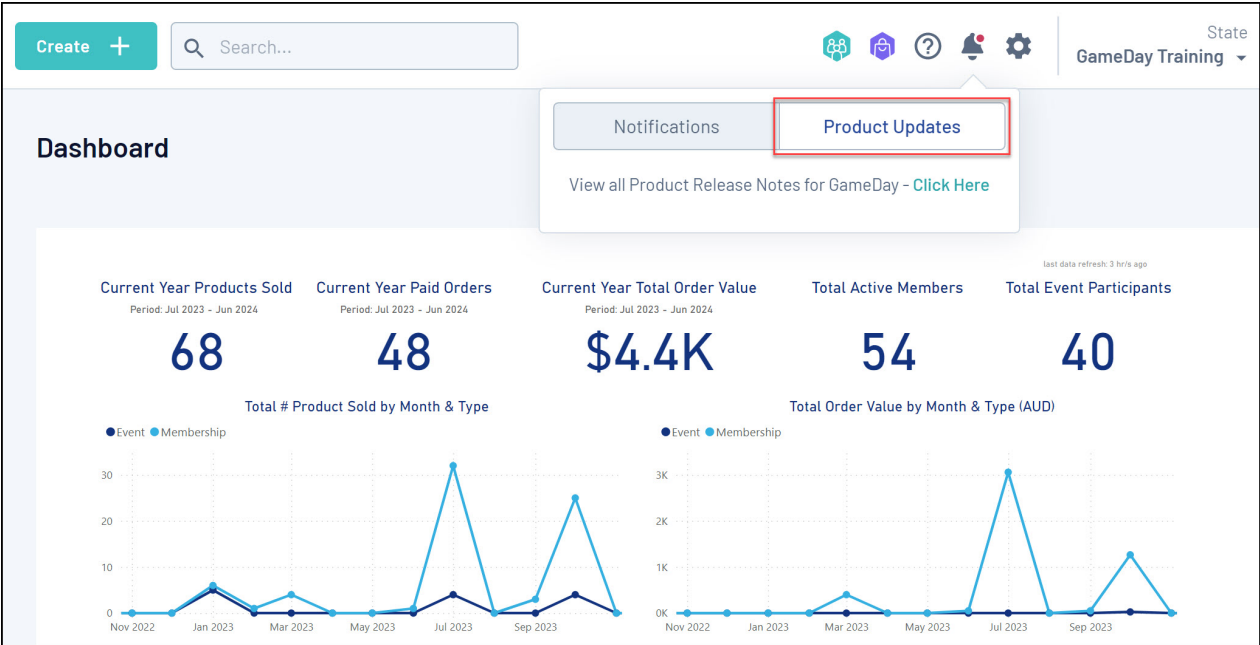

The Notifications widget can be found using the **BELL** icon in the top toolbar:

The **Notifications** tab provides system-based notifications related to your GameDay database

The **Product Updates** tab is for notifications related to the latest product updates, new features, release notes and product announcements.
