

Discount Calculation Rules

Last Modified on 15/09/2023 2:48 pm AEST

In GameDay, all Discounts are calculated against the original product price. Below are some general calculation rules which are applied on registration forms in different product scenarios:

- Standard Discounts
 - If there are multiple Standard Discounts applicable for the same product, the highest discount amount will apply.
 - If there are multiple Standard Discounts applicable for the same product, the most recently created discount will apply.
- Multiple Quantity Discounts
 - Multiple Quantity Discounts take priority over standard discounts within the same purchase order.
 - If there are two or more Multiple-Quantity Discounts applicable for the same product, the highest discount amount would apply.
 - If there are two or more Multiple-Quantity Discounts applicable for the same product where the discount amount is the same, the most recently created discount will apply.
- Bundle Discounts calculates against the original price and
 - Bundle Discounts take priority over Standard or Multiple-Quantity Discounts within the same purchase order.
 - If there are multiple Bundle Discounts applicable for the same product, the highest bundle discount amount will apply.
 - If there are multiple Bundle Discounts applicable for the same product where the discount amount is the same, the most recently created discount will apply.

Discount Scenarios

Scenario 1: Single Person Registration

- Scenario 1A (where Standard and Multiple-Quantity Discounts are both available): User purchases 2x *Product A*
 - Multiple-Quantity Discount would apply (prioritisation of Multiple-Quantity Discount)
 - Scenario 1B (where Standard, Multiple-Quantity and Bundle Discounts are all available): User purchases 2x *Product A* + 1x *Product B* + 1x *Product C* + 1x *Product D*
 - Bundle Discount would apply to 1 x *Product A* (prioritisation of Bundle Discount)
 - Standard Discount would also apply for 1 x *Product A*
 - Scenario 1C: (Standard v Bundle): User purchases 1x *Product A* + another 3 Products (B, C + D) which is part of a Bundle
 - Bundle Discount would apply (prioritisation of Bundle Discount)
 - Scenario 1D: User purchases 1 x *Product A* and 2 x *Product B* + 1 x *Product C*
 - Standard Discount would apply (no other discounts for *Product A* qualify)
 - Scenario 1E (Standard v Multi-Quantity v Bundle): User purchases 5 x *Product A* + another three Products (B + C + D) where *Product A* is now part of a Bundle Discount with Products B, C & D
 - Bundle Discount would apply to 1 x *Product A* (prioritisation of Bundle Discount)
 - Multi-Quantity Discount would also apply for 4 x *Product A*
-

Scenario 2: Multi-Person Registration

- Scenario 2A: User purchases 1x *Product A* for Person 1 (Standard Discount would apply on Summary Screen after this registration). User adds Person 2 to registration and purchases 3 other Products (B, C & D) where *Product A* is part of a Bundle Discount
 - Bundle Discount would apply (prioritisation of Bundle Discount)
 - *Standard Discount is replaced on summary screen as Bundle Discount now applies.*

- Scenario 2B: If Person 2 is removed from the registration on Summary Screen
 - *Bundle Discount is now replaced on summary screen as Standard Discount now applies*
- Scenario 2C: If Product C is removed from the registration on Summary Screen
 - *Bundle Discount is replaced on summary screen as Standard Discount now applies*
- Scenario 2D: If Person 1 is removed from the registration on Summary Screen
 - *No discounts would apply as Product A is removed from the purchase order*
