

## Form with Standard Discount (single quantity)

Last Modified on 23/05/2022 12:38 pm AEST

This gives an overview of the form for users when using a Standard discount; single quantity, which means that the discount only applies for one quantity of the product/s selected. This can be applied for a single product or multiple products.

The form will be similar depending on the type of discount applied (amount and percentage) to products so only amount will be used as an example here.

*In this scenario I have created a standard discount called "Black Friday Ash", where any of the Black Friday products purchased receive a \$30 discount when purchased.*

1. Users will log into the form and input personal details.

Within the **PRODUCTS** part of the form, users can see the Black Friday Product 1, 2 & 3.

2. Select Black Friday 1, Black Friday 2 and BD Ash (outside discount).

### Select your products

<b>BD Ash</b>	\$ 45.00 AUD	<input checked="" type="checkbox"/>
PVT National Body		
Processing Fee \$ 0.18 AUD		
<b>Black Friday 1</b>	\$ 45.00 AUD	<input checked="" type="checkbox"/>
PVT National Body		
Processing Fee \$ 0.18 AUD		
<b>Black Friday 2</b>	\$ 55.00 AUD	<input checked="" type="checkbox"/>
PVT National Body		
Processing Fee \$ 0.21 AUD		
<b>Black Friday 3</b>	\$ 100.00 AUD	<input type="checkbox"/>
PVT National Body		
Processing Fee \$ 0.39 AUD		

3. Continue through form until you get to the **SUMMARY** page.

Here you will see that the \$30 discount has been applied for both products that were part of the BLACK FRIDAY standard discount and this has also applied to the total of the registration.

- *In this scenario BD Ash is at full price as this product was not part of the standard discount*
- *In this scenario Black Friday 1 was \$45 > \$45 - \$30 = \$15 and Black Friday 2 was \$55 > \$55 -*

*\$30 = \$25.*

- *If you add both discounts together (\$30 x2 products) you get a total of \$60 discount off the total price of the registration.*

**NOTE: processing fees are excluded from discounts so will still apply to the total amount.**

The screenshot shows a registration form for 'Hope Mikaelson'. The 'Products' section lists three items:

Product	Price
BD Ash <small>Processing Fees \$ 0.18 AUD</small>	\$ 45.00 AUD
Black Friday 1 <small>Black Friday Ash - \$30.00</small> <small>Processing Fees \$ 0.06 AUD</small>	\$ 15.00 AUD
Black Friday 2 <small>Black Friday Ash - \$30.00</small> <small>Processing Fees \$ 0.10 AUD</small>	\$ 25.00 AUD

Below the products is a 'Have a voucher code?' section with a dropdown for 'NSW Government' and an 'Apply' button. A 'Register Another Person' button is also present.

The summary section at the bottom shows:

Subtotal	\$ 145.00 AUD
Black Friday Ash	- \$ 60.00 AUD
Processing Fees	\$ 0.34 AUD
<b>Total</b>	<b>\$ 85.34 AUD</b>

Annotations with arrows point to various elements:

- A purple box: 'Product not part of discount sits with full price' points to 'BD Ash'.
- A red box: 'The discount these products are part of is listed and what percentage or amount is applied.' points to the 'Black Friday Ash - \$30.00' text in both Black Friday 1 and 2 rows.
- A red box: 'Products that are part of the "BLACK FRIDAY" discount have the \$30 off the full price.' points to the 'Black Friday 1' and 'Black Friday 2' rows.
- A red box: 'The "BLACK FRIDAY" discount has also been applied to the total amount.' points to the 'Black Friday Ash - \$ 60.00 AUD' line in the summary.
