GAMEDAY

ECAL | Selecting which events are included in your sync

Last Modified on 21/11/2024 2:04 pm AEDT

Overview

GameDay Events users can choose which events display in their ECAL event calendar sync when creating and publishing an event, or when editing an existing event.

Step-by-Step

Step 1: Head to your Events list in GameDay

In the left-hand menu, click **Events** > **MANAGE EVENTS**

Step 2: Edit an event

Find the relevant event, then click **EDIT**

> **Note**: If you don't have any events created, click here to learn more about creating Events

Step 3: Head to the Publish tab

Navigate to the **PUBLISH** tab

Step 4: Set the event to show on your calendar

Scroll down to the Calendar section, and ensure the **DISPLAY EVENT ON CALENDAR** checkbox

This will include the event when you use your ECAL integration to publish an event calendar. You can exclude an event from the ECAL event calendar sync by un-ticking the same checkbox

Finally, click **SAVE**

Repeat this process for any other events that you want to appear on your calendar widget

Watch

Your browser does not support HTML5 video.

What Next?

With events configured to display in your calendar, you can now grab the embed codes to add to your website
