

Step 3: Finding and copying the event calendar widget

Last Modified on 30/09/2022 10:47 am AEST

After an admin has created an event and has set each of their events to be linked to this ECAL calendar, admins have the ability to display these events on an external website via different widgets.

More information on these types of displays can be found on the [ECAL event website](#).

There are three different types of widgets that an admin can insert into their website:

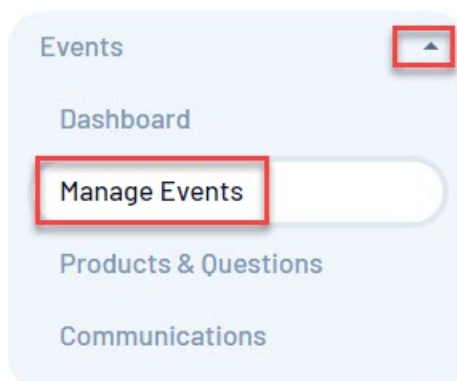

1. **PAGE VIEW-** The 'Page' mode provides a detailed, interactive and attractive display of your events, perfect for your 'What's On?' or 'Events Calendar' page. To view a live version of this type of view, [click here](#).
2. **CAROUSEL VIEW-** The 'Carousel' mode provides a high impact, high attention display of your events, perfect for your homepage, beneath your site masthead. To view a live version of this type of view, [click here](#).
3. **COLUMN VIEW-** The 'Column' mode provide a neat, highly flexible, high impact display of your events in a vertical column, perfect for a side margin across the inside pages of your website. To view a live version of this type of view, [click here](#).

HOW TO INSERT THIS WIDGET INTO A WEBSITE?

Below provides an outline as to how to view and copy the coding needed to insert these types of widgets into your website.

There are two sets of code that is needed in order for the widgets to display correctly. You can use one or multiple of these widgets on your website- it is entirely up to you.

1. Click the drop down arrow against **EVENTS** and click against **MANAGE EVENTS**.

2. Click into the **ECAL WIDGETS** tab.

3. Displayed here and the three different types of views that this calendar can be displayed as, click **VIEW** against the relevant widget you wish to use.

Widget Type	Publisher ID	Widget ID	Action(s)
Event Display - Page	14448		View
Event Display - Carousel	14448		View
Event Display - Column	14448		View

4. On the **WEBSITE** tab, this is where you can copy the codes to insert into your website. Click the **COPY** button against each set of code.

Event Display - Page

Website Preview Example

Embed In your HTML Page

1. Copy & Paste this JavaScript code into the <head> of the website

```
<script>(function(){var s = document.createElement('script'); s.src = 'https://display.ecal.net/v2/widget.js+?t=' + Date.now(); document.getElementsByTagName('head')[0].appendChild(s);})();</script>
```

Copy

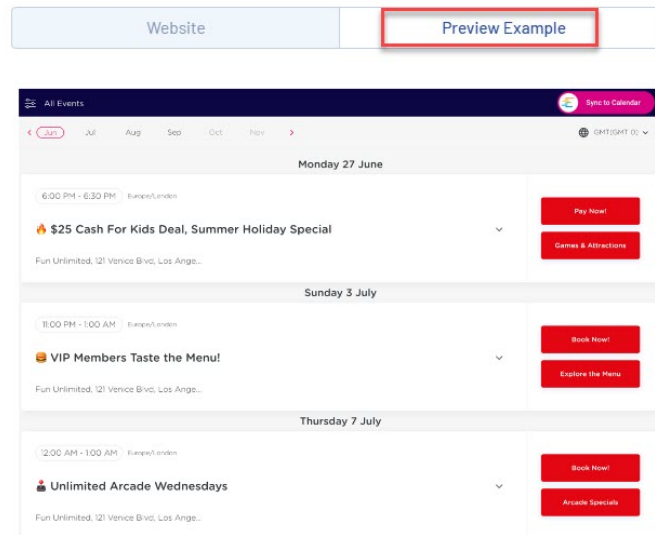

2. Then, Copy & Paste this HTML code wherever you would like the Event Display to appear on the website

```
<div class='ecal-sync-widget-event' data-ecal-apikey='rqFnPNIMetMbJs20dx0hDW8nrU6IzcpMjcktpXMd462d8bac07' data-ecal-widget-id='62d8bac0cb6f19000fa580ed' data-ecal-widget-type='page'></div>
```

Copy

5. You can view how this will display on your website via clicking into the **PREVIEW EXAMPLE** tab.

Event Display - Page

6. Copy and paste this coding into your website.

- If your website is not a GameDay hosted website and you are unsure on how to add this into your website, please speak to your IT person or find someone who knows about this side of things (our support team will not be able to help you on this side of things).
- If your website is a GameDay hosted website, please [click here](#) to see what information you need from these widgets in order to be able to integrate into your website.
