Background Colour vs Background Image

Last Modified on 19/08/2024 11:56 am AEST

For each section you have the ability to set either a background colour or background image.

Below provides an example of what both look like when assigned on a website

BACKGROUND COLOUR

Multiple colours cannot be selected for one page panel, only one solid colour.
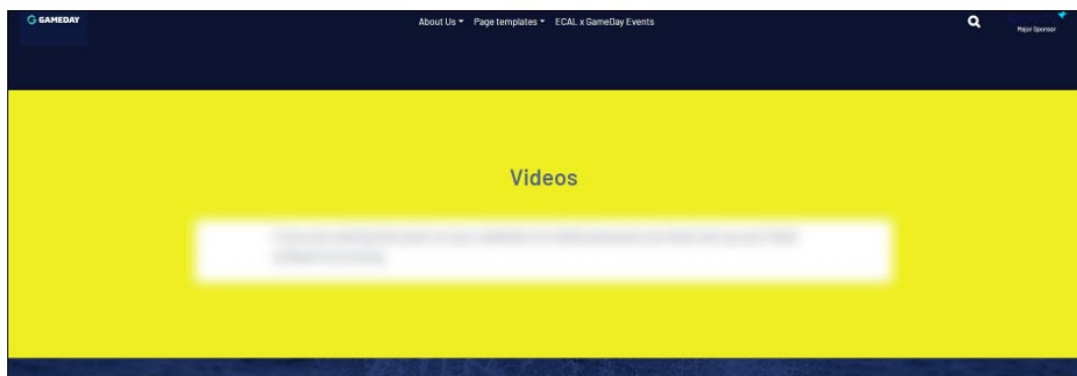

BACKGROUND IMAGE

When adding a background image, this should be a solid image.

Maximum upload file size: 50 MB. 1600 x 800 pixels is recommended. Make sure the image is cropped to suit the parts of the image you wish to have displayed.
