NOTE: This **PLAYER LIST PAGE** add on has to be enabled for your organisation. To check if this is available for your website, check your [GameDay Dashboard](#).

Teams need to be added before you can display the relevant players on the team on the team page. Teams can be added via:

1. Hover over **CONTENT**.
2. Hover over **TEAMS**.
3. Click on **ALL TEAMS**.

4. Input a Team Name into the **NAME** field and then click **CREATE NEW TEAM**.

Create a New Team

Name

The name is how it appears on your site.

Slug

The "slug" is the URL-friendly version of the name. It is usually all lowercase and contains only letters, numbers, and hyphens.

Parent Team

Assign a parent term to create a hierarchy. The term Jazz, for example, would be the parent of Bebop and Big Band.

Description

The description is not prominent by default; however, some themes may show it.

Team will now show on right hand side list.

5. Repeat for all relevant teams.
