GameDay's **Settings** page provides a number of important configurations through which you can future-proof the way your database collects information.
To access the **Settings** page:

On the left-hand menu, open the **My Organisation** menu and click **SETTINGS**

Dashboard

My Organisation ▲

Organisation Details

Admins & Contacts

My Hierarchy

Reports

Features

On the **Settings** page, you can access a number of important features, including:

1. Seasons & Age Groups: Allows you to create custom Seasons and Age Groups by which to categorise and link members and products - Learn More

2. Member Types: Allows you to create custom Member Types which you can add as selectable options on your membership and event forms, allowing you categorise members into your own custom groups - Learn More

3. ID Management: Allows you to create custom ID allocation sequences which can be automatically allocated to certain assets within your database, including Member IDs, Event IDs, Event Participant IDs and Organisation IDs - Learn More

For more information on processes relevant to the **Settings** page, please refer to the **Related Articles** section of this article.
