GAMEDAY

How do I generate a QR Code for my Membership Form?
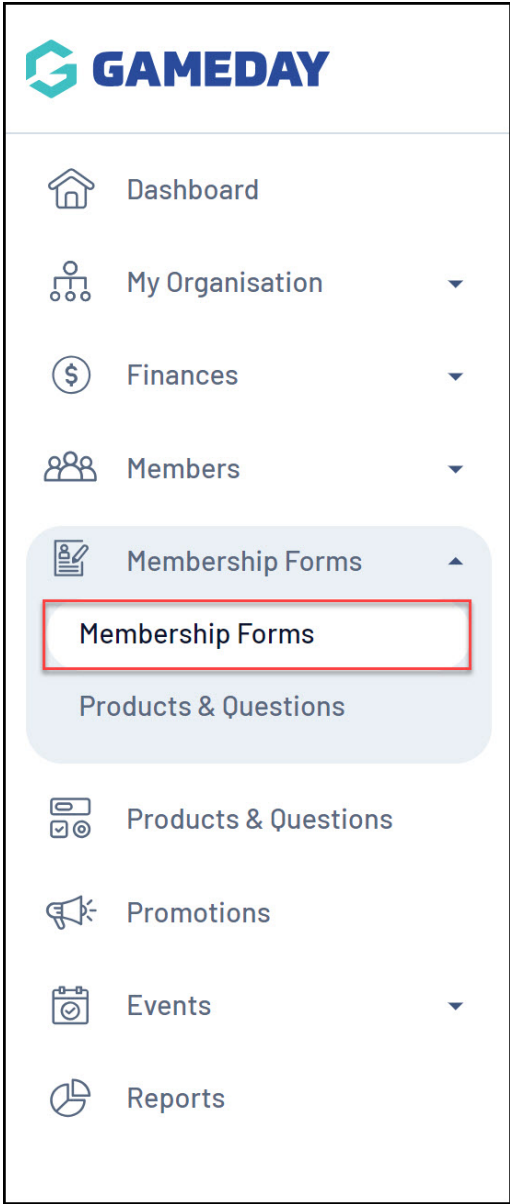

With GameDay's QR Code generator, administrators can download a QR Code directly from GameDay to provide to members as a link to a specific Membership Form.
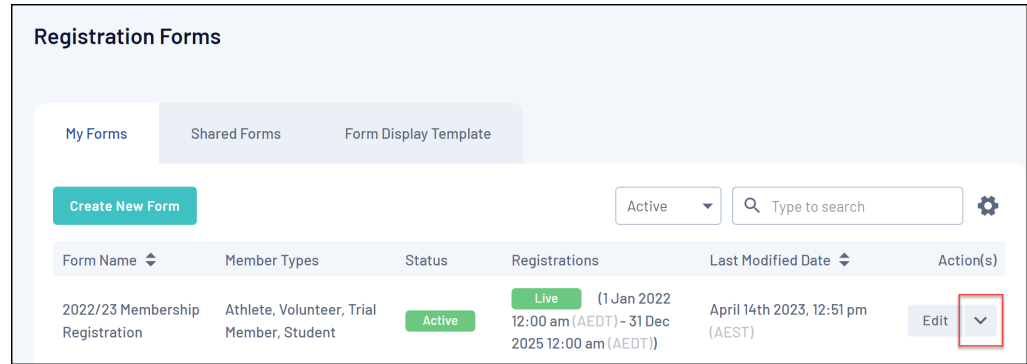

This is designed to give members a quick and easy way to access a Membership Form through their mobile device and offers the flexibility to scan the QR Code as a printed copy, included in communications, or directly through GameDay.

To generate a Membership Form **QR Code**:

1. In the left-hand menu, open the **Membership Forms** menu and click **MEMBERSHIP FORMS**.

2. Find the Membership Form for which you want to generate a QR Code, then click the **Actions Arrow** > **GENERATE QR CODE**.

This will generate your QR Code. You'll notice that scanning this with your mobile device will automatically send you to a link to your selected Membership Form.

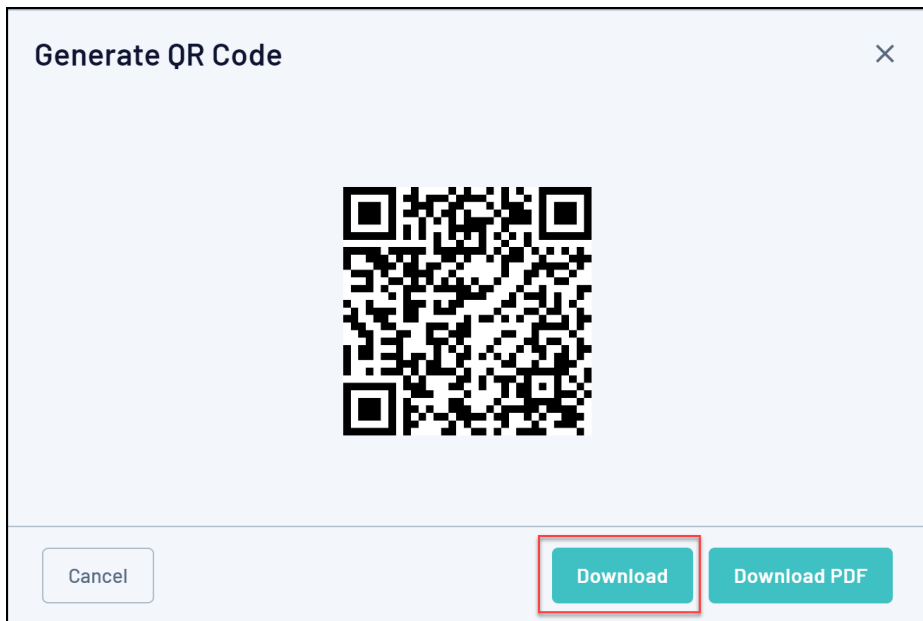

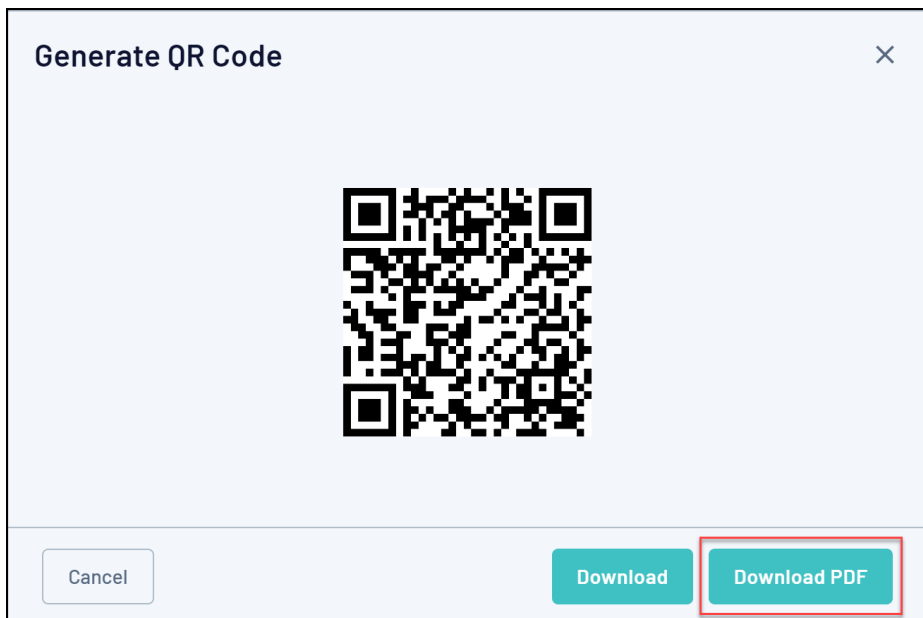

3. Here, you will have two options:

- **Download**: Allows you to download a direct image file of your QR Code.

- **Download PDF**: Allows you to download a formatted PDF version of the QR Code which also includes:
  - The QR Code
  - The Name of the Membership Form
  - Your Organisation Logo
  - Your Organisation Name
