

## How do I create a Standard Multiple Quantity Discount?

Last Modified on 13/02/2024 3:47 pm AEDT

GameDay's **Discounts** feature allows users to create **Single Quantity Discounts**, whereby different amounts can be discounted based on the quantity of products purchased.

To create a Single Quantity Discount:

1. In the left-hand menu, click **PROMOTIONS**

2. Click **CREATE NEW DISCOUNT**

3. On the **Create Discount** screen, complete all the details below:

- **Discount Name:** The name of the discount that will appear in your GameDay database, and on the summary screen when the discount is applied on the selected form or event
- **Discount Type:** Select **STANDARD DISCOUNT**
- **Discount Sub Type:** Select **MULTIPLE QUANTITY**

Click **CREATE DISCOUNT**

The screenshot shows a 'Create Discount' modal window. It has a title bar with 'Create Discount' and a close button (X). The form contains three fields: 'Discount Name \*' with the value 'Multi Merch Discount', 'Discount Type \*' with a dropdown menu showing 'Standard Discount', and 'Discount Sub Type \*' with a dropdown menu showing 'Multiple Quantity'. At the bottom right, there are two buttons: 'Cancel' and 'Create Discount', with the 'Create Discount' button highlighted by a red box.

4. On the **Discount Details** screen, complete any relevant details below:

- **Description:** Enter an optional description if you want to note some information about the discount to be seen in your GameDay database
- **Available From:** Choose the date on which the discount will start being available
- **Available To:** Choose the date on which the discount will stop being available
- **Status:** Choose whether to keep the discount in a Draft state or set it to Active or Inactive

Click **SAVE**
