

How do I style my Shop Forms?

07/08/2025 12:42 pm AEST

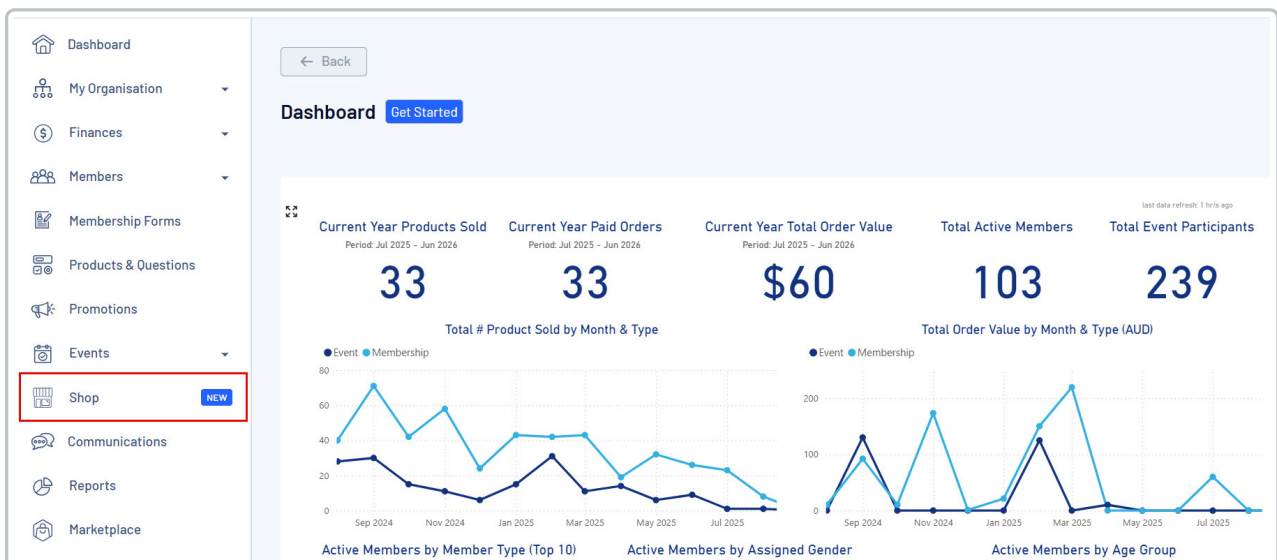

Overview

Organisations can customise the appearance of their Shop Forms to align with their own branding. This allows for a more consistent and professional look and feel for members purchasing products through your GameDay shop. By using the **Shop Forms Display Template** option on the Shop screen, you can apply one consistent brand to all your shop forms.

Step-by-Step

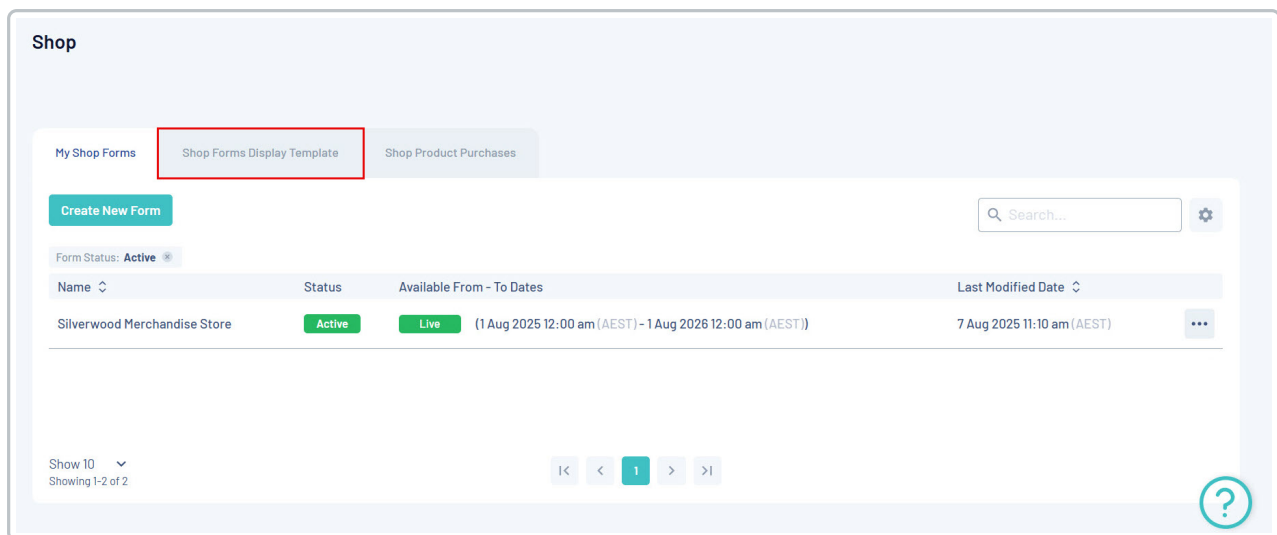

Step 1: Navigate to the Shop screen

In the left-hand menu, click **SHOP**

Step 2: Access the Shop Form Display Template

On the Shop page, click the **SHOP FORMS DISPLAY TEMPLATE** tab to open the styling options

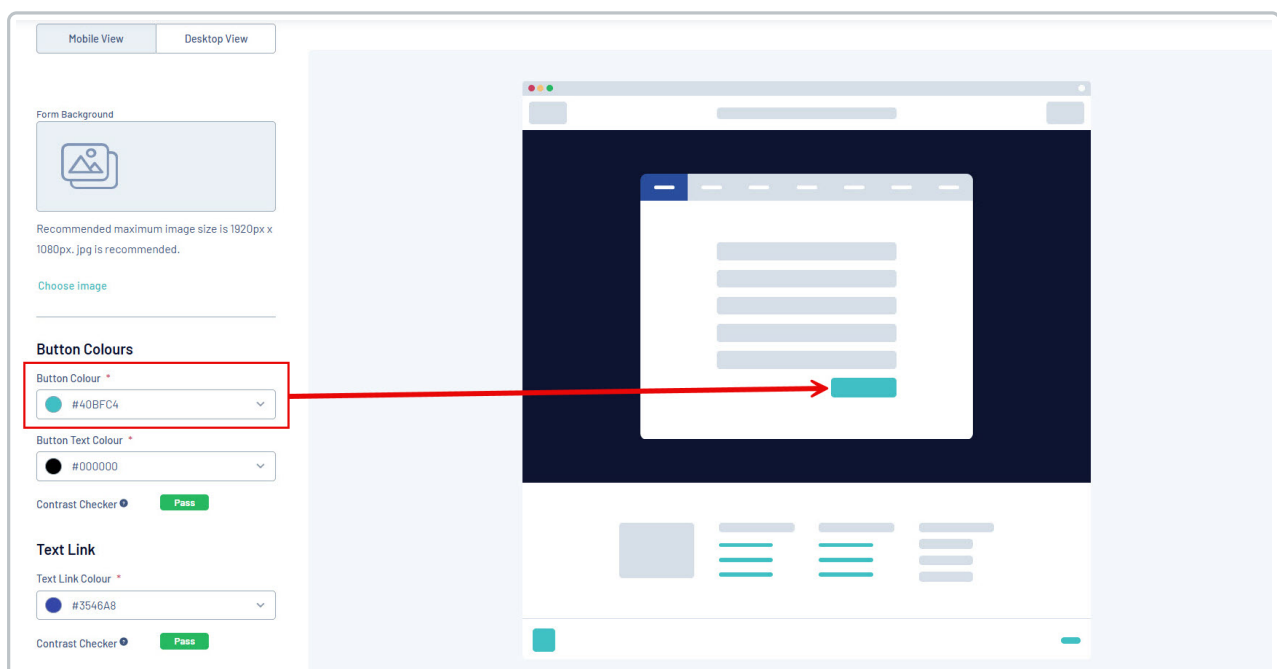

Step 3: Customise your form colours

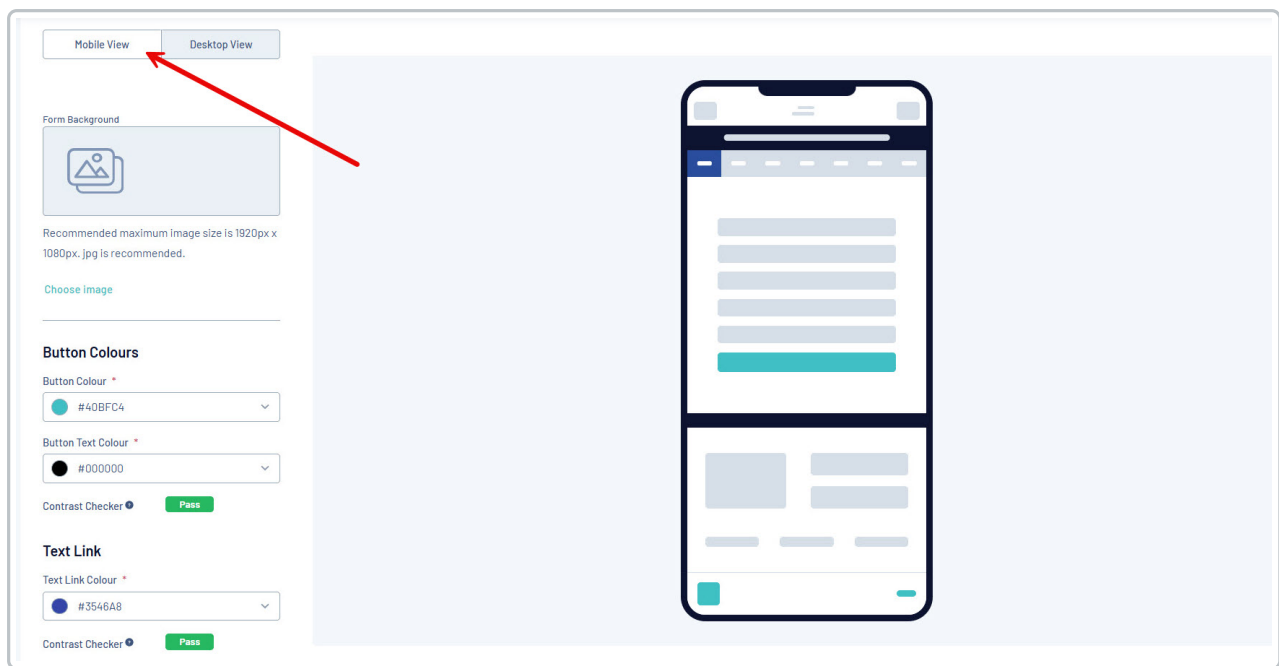

Use the colour pickers to select your desired colours or enter specific hex codes for the various form elements. Key areas to customise include:

- **Button Colours:** Set the background and text colour for form buttons
- **Text Link:** Set the colour for hyperlinks
- **Background Gradients:** Choose primary and secondary colours for a gradient background effect
- **Form View Settings:** Customise the Header, Progress Bar, and associated text colours

Make sure your colour combinations achieve a **Pass** on the **Contrast Checker** for readability

You can also preview how the styling would look on both **Mobile View** and **Desktop View**

Step 4: Save your template

Once you have finished customising the template, scroll to the bottom of the page and click **SAVE**. Your live shop forms will now be updated to reflect the new styling, providing a customised experience for your members.
